

Tour Report India's Red Pandas, Rhinos & Tigers 3 – 19 November 2025

Red panda

One-horned rhino

Royal bengal tiger

Indian wild dog

Compiled by Swanand Deshpande

This 16-day journey took us from the high ridges of Singalila to the floodplains of Kaziranga and the sal forests of Kanha. In the Eastern Himalayas, we enjoyed clear mountain views, brilliant sunsets and some truly special wildlife moments, including multiple sightings of red pandas—one of them a mother with two cubs. The walks and drives around Tonglu, Kaiyakata and Gairibas gave us a wonderful mix of laughingthrushes, minivets, warblers and several high-altitude species, along with memorable encounters like Bhutan flying squirrels after dark.

In Assam, the wetlands of Deepor Beel and the grasslands of Kaziranga added a completely different flavour to the trip. Rhinos, elephants, water buffalo and swamp deer kept us busy throughout, and the birdlife around the lakes and woodlands was excellent. A rare pied falconet, active hoolock gibbons and the Assam roofed turtle were major highlights. The most unforgettable moment here was the sighting of Kaziranga's golden tiger, seen twice as it crossed the grasslands and swam across a channel.

The final leg in Kanha brought us into the calm sal forests of Central India. Barasinghas in the meadows, blackbucks near Schaller Point, lively birding sessions and frequent jackal encounters set the tone. We had excellent views of wild dogs and two memorable tiger sightings, including MV3 walking right across the track.

Across all three regions, the trip offered a rich mix of landscapes, wildlife and experiences, leaving everyone with memories that will stay for a long time.

Tuesday 4 November 2025

Day 1:

Arrive in Delhi

We reached Delhi Airport, checked in at the Vivanta-Dwarka, and then had the whole day free to relax and recover from the plane journey.

Wednesday 5 November 2025

Day 2:

Fly To Bagdogara, Maney Bhanjyang

We started early in the morning, leaving for the airport at 5 am to catch our flight to Bagdogra. After landing, we were greeted by the local team and began our journey towards Maney Bhanjyang. On the way, we saw a few laughingthrushes, large-billed crows and some Assam macaques.

Once we reached the hotel, we quickly freshened up and left for our first drive towards Tonglu. Not long after starting, we were rewarded with a beautiful scarlet sunset that lit up Kanchenjunga in vibrant colours. While we were enjoying the view, Swan spotted an owl landing on one of the hillocks. With a bit more scanning, Rio saw a short-eared owl taking off into the valley. After a few minutes of waiting, it showed again, this time with its partner. Both owls kept flying across the valley with the sunset behind them. It was a stunning sight. From time to time, a Himalayan buzzard tried to mob them, but the owls continued returning to what seemed like their roosting site. We stayed there until the sun disappeared behind the high Himalayas.

After this, we drove to Tumling and enjoyed a hot cup of Darjeeling tea. As it began to get dark, we started our descent. On the way down, in the beam of the car's headlights, we caught a brief glimpse of a Himalayan owl flying past.

After dinner, we retired for the night.

Thursday 6 November 2025

Day 3:

Singalila National Park

The day began with a beautiful sunrise. After a warm bowl of porridge and some fresh fruit, we started our drive towards Singalila. Not long after, we spotted the first bird of the day — a Himalayan buzzard perched on an electric pole. Below it, a few blue-fronted redstarts were hopping around the bushes. Our next halt was at Tonglu, where the clear weather gave us a full view of the Kanchenjunga range from the viewpoint.

We walked for a while and enjoyed watching several lovely birds, including white-browed fulvetta, yellow-billed blue magpie and whistler's warbler. Soon we reached the entrance gate of Singalila National Park. While the formalities were completed, we took in the surroundings. Once inside the park road we were greeted with a stunning view of Mt. Everest.

We continued to Gairibas, where we had a light breakfast before heading towards Kaiyakata. On the way, we stopped to see a few new birds, such as striated laughingthrushes. Around this time, Rio received news that a red panda had been sighted nearby. We quickly headed towards the location. The driver dropped us off and we followed Rio on foot. After about 15 minutes of walking through slush, thorny bushes and uneven ground, Rio pointed to the magnificent firefox high upon a tree. It was around ten metres above the ground, actively marking its territory on a branch. Cameras and binoculars were instantly out. We watched it for about ten minutes before quietly leaving it in peace.

We continued to Kaiyakata, where the team had kept our lunch hot and ready. After lunch, we carried on birdwatching and added a few more species to our list, including rufous-vented yuhinas, striped yuhinas, black-faced laughingthrush, hoary-throated barwing and long-tailed minivet. Later in the evening, we went out again to look for nocturnal wildlife. We were lucky to see around three Bhutan flying squirrels, a species endemic to this region.

Friday 7 November 2025

Day 4:

Singalila National Park

It was a new day in Maney Bhanjyang, and we were lucky to have another clear morning.

After breakfast, we set out and soon started seeing new birds such as olive-backed pipits, red-billed leiothrix, yellow-browed warbler, buff-barred warbler and a few more. At Tumling, our permits were checked, and from there we began a seven-kilometre hike to Gairibas. The trail was easy and offered beautiful views. It passed through rhododendron forest patches, open grasslands and rocky sections.

Along the way, we recorded birds like mountain hawk eagle, Darjeeling woodpecker and red-headed bullfinches. After a lovely walk, we reached Gairibas, got into our trusted 4x4 vehicles and continued towards the old trail near Kaiyakata. Just as we arrived, Rio received another call about a red panda sighting. We drove to the drop-off point and started walking. Within a few minutes, we saw our trackers. They pointed out a panda perched high on a tree, nearly 40 feet above the ground. We were thrilled to watch it move along the branches and mark its territory. Soon, we were told that the panda was a female and had two cubs. We were very lucky to see the cubs as well. They were almost the size of their mother and were curled up close together, their tails wrapped around their faces. It was an unforgettable sight.

After about ten minutes, we quietly left them in peace and returned towards the vehicles. On the way back we saw a shy brown parrotbill and a few black-faced laughingthrushes feeding on berries.

In the evening, we regrouped and relived the magical memory of seeing the red panda family.

01962 302086 sales@wildlifeworldwide.com www.wildlifeworldwide.com

Saturday 8 November 2025

Day 5:

Drive to Siliguri

Today we drove to a different side of the hills, towards Sukhia Pokhri.

It turned out to be an excellent day for birdwatching. We came across a large flock of golden-breasted fulvetta and several laughingthrushes, including chestnut-crowned, scaly, spotted and black-faced. From a viewpoint overlooking the valley, we also saw dark-breasted rosefinch, green-backed tits, green-tailed sunbird and, as the highlight, a bay woodpecker.

We returned to Shikhar Tarry and got ready for lunch. After lunch, we thanked the wonderful team and began our three-hour drive to Siliguri, where we spent the night.

Sunday 9 November 2025

Day 6:

Fly to Guwahati

We left early in the morning for Bagdogra airport, and our flight to Guwahati departed on time.

While our rooms were being prepared, we decided to visit Deepor Beel lake for a short birding session. Even though it was the middle of the afternoon, the birdwatching was excellent. We saw chestnut-tailed starlings, Eurasian hoopoes, black-rumped flameback woodpeckers, open-billed storks, black-hooded oriole, black-headed and brown-headed gulls, and both greater and lesser adjutant storks, among others.

After a short trip to the lake, we returned to the hotel and rested well.

Monday 10 November 2025

Day 7:

Kaziranga National Park

Early in the morning we left for the 4.5-hour drive to Kaziranga. On the way, we stopped at Nagaon village to watch lesser adjutant storks nesting on the bombax trees. There were three pairs in total. It was a pleasure to watch them take turns, returning again and again with nesting material. We then continued our journey towards Kaziranga.

As soon as we entered the national park boundary, we were greeted by our first rhino, along with water buffalo and hog deer.

We reached Infinity Lodge around lunchtime. After freshening up and eating lunch, we headed out for our first safari in the central zone of Kaziranga. Within minutes of entering the gate, we saw a rhino very close to us, with the Karbi hills forming a beautiful backdrop. Sharing the grassland was a large herd of eastern swamp deer and several water buffalo. We also had a close sighting of an Indo-Chinese roller.

A little ahead, while crossing the first wooden bridge, we spotted a single smooth-coated otter swimming in the river below. A few white-throated kingfishers, darters and pied kingfishers were also feeding around the water.

Once we crossed the riverine patch, the landscape opened into the vast floodplains of the Kohora range. Here we saw more rhinos, water buffalo and hog deer, along with spot-billed pelicans, grey-headed lapwings, grey and white wagtails and many others. Near the second watchtower, a series of loud swamp deer alarm calls made us stop at a crossroads to investigate. As we waited, we watched a silk cotton tree being visited by several birds — rose-ringed and Alexandrine parakeets, streak-throated woodpecker and

Find out more about our [India's Red Pandas, Rhinos & Tigers](#) trip or [contact us](#)

01962 302086 sales@wildlifeworldwide.com www.wildlifeworldwide.com

grey-crowned pygmy woodpecker. Below the tree, a chorus of partridges called from the elephant grass, and soon a flock of six swamp francolins stepped out to feed.

Before long, we heard alarm calls spreading through the distant grassland — a clear sign that a tiger was moving. We returned to the first watchtower and saw a male tiger walking through the grassland, with hog deer scattering in all directions. Although it was far off and close to sunset, it was an excellent start to our Kaziranga experience.

Tuesday 11 November 2025

Day 8:

Kaziranga National Park

We met for breakfast and left for safari at 7:30 am. Today we explored the eastern zone of Kaziranga, an area known for its mix of lakes, woodlands and dense grasslands — a landscape that offers something for everyone.

Our first stop came even before entering the park. While passing through Agoratoli village, we saw a few oriental pied hornbills perched on a jackfruit tree. We watched them for a few minutes before moving on. A little further ahead, a stork-billed kingfisher perched on a wire alongside white-throated kingfishers and Asian pied starlings — a lovely combination to see together.

After entering the gate, we paused to watch a rhino grazing calmly while myna birds picked ticks from its back. Around it was a wonderful mix of birds and mammals. A group of swamp deer stags fed on aquatic grasses, water buffalo wallowed nearby, and a pair of otters played on a distant sandbank. Northern lapwings, grey-headed lapwings, black-headed ibis and other waders filled the open mudflats. Further away, a mixed flock of gadwall, northern pintails, greylag geese and spot-billed duck rested on the water.

As the morning warmed up, raptors began to soar overhead. We saw crested honey buzzard, Indian spotted eagle, ospreys, grey-headed fish eagle, Pallas's fish eagle, Eurasian hobby and a female hen harrier — an impressive variety for one session.

A bit ahead, a handsome male Asian elephant with long tusks was feeding on water hyacinth at close range. On our way back toward the exit, we stopped at a large tree where a family of three spotted owlets lived. One by one they peeped out from the tree hole, watching the world go by.

We returned to the lodge for lunch.

In the evening, we visited the western zone. Here, rhinos were everywhere. One rhino had a young calf hiding behind her — just a few years old and a joy to watch. On the other side of the road, another mother and calf were feeding. This older calf was being pushed away by the mother, likely as part of natural territorial behaviour. On our way back to the gate, we came across a huge tusker emerging from the swamps and walking onto the road. With tusks nearly four feet long, this elephant towered over everything around it.

Wednesday 12 November 2025

Day 9:

Kaziranga National Park

We left the lodge early to visit the beautiful and remote far western zone, Burrapahad.

On the main AH1 highway that passes through the national park, we spotted a rare bird — the world's smallest raptor, a pied falconet.

Find out more about our [India's Red Pandas, Rhinos & Tigers](#) trip or [contact us](#)

01962 302086 sales@wildlifeworldwide.com www.wildlifeworldwide.com

Soon after, we saw one of our key target mammals: a female hoolock gibbon. She was perched high on a tree, feeding on leaves. In the same tree was a young male hoolock gibbon with his black coat, in contrast to the female's pale brown. We watched their smooth acrobatics for a few minutes before continuing towards the safari entry point.

After entering the forest, we stopped near a lake where we saw a male muntjac, grey-headed lapwings, Temminck's stint, greenshanks, ruddy shelducks and several other birds. We also spent a little time watching hog deer and some beautiful butterflies. Further ahead, we stopped at a large fig tree to look for tokay geckos. Three geckos were well hidden inside the narrow cavities of the trunk.

At the banks of the wide Brahmaputra, we climbed a watchtower to observe the wildlife around. Suddenly, a troop of capped langurs — around twenty individuals, both adults and babies — arrived in the trees. In the shallows below, we also saw the endangered Assam roofed turtle, a species found only in the Brahmaputra drainage.

We returned to the lodge for lunch.

In the afternoon, we left for our final safari of the Kaziranga part of the tour. Back in the central zone, several jeeps were crowding the area where the tiger had been seen earlier. With so many vehicles lined up on the narrow road, we had little chance of a clear view. So we decided to stay back and watch from a distance.

It turned out to be the right choice. As the tiger stepped out of the grass and onto the road, we realised it was the famous golden tiger of Kaziranga — a rare genetic form where the dark pigment is greatly reduced, leaving a pale golden-orange coat. We watched as he crossed the road and disappeared into the tall elephant grass.

We waited to see if he would reappear. While waiting, we saw a rare bird, the Indian grass-bird. Soon, the water buffalo in the distance grew alert, and moments later, the tiger emerged again near the water's edge. With the bright green grass behind him, the golden tiger made an unforgettable sight. He then entered the water and swam across the lake before vanishing into the thicket.

It was a perfect end to the safari, and we returned to the lodge with big smiles.

Thursday 13 November 2025

Day 10:

Fly to Kolkata

We enjoyed a much-needed relaxed morning. We left Kaziranga at 9:30 am. From Jorhat Airport we flew to Kolkata for an overnight stop.

Friday 14 November 2025

Day 11:

Fly to Raipur, Drive to Kanha

At 4:30 am, we set off for the airport to board our flight to Raipur. The journey was smooth, and by around 8 am, we had landed and begun our scenic drive towards Kanha National Park, watching the landscape gradually transform from bustling town limits to the forested countryside of Central India.

After reaching the lodge, we enjoyed a relaxed lunch followed by a short break to settle in. Later in the afternoon, we headed out for our first safari in the Mukki zone, filled with excitement and fresh anticipation. The forest welcomed us warmly—one of the first highlights was a pack of seven jackals, trotting confidently along the track and giving us wonderful views. Not far ahead, we came across five hoopoes dust-bathing, their crests flashing beautifully as they moved around the soft soil. A striking crested hawk-eagle in its white

Find out more about our [India's Red Pandas, Rhinos & Tigers](#) trip or [contact us](#)

01962 302086 sales@wildlifeworldwide.com www.wildlifeworldwide.com

morph perched regally on an open branch, glowing in the mellow evening light. Along the way, we also enjoyed sightings of many more birds that set the perfect tone for the days ahead in Kanha.

Saturday 15 November 2025

Day 12:

Kanha National Park

Back in the Mukki zone, we enjoyed a truly rewarding morning drive. Large herds of barasinghas grazed peacefully in the meadows, offering excellent photographic opportunities and a chance to appreciate this iconic species of Kanha up close. The birdlife was equally impressive, with a steady movement of winter migrants across the sal and bamboo forests. One of the standout sightings was a cinnamon bittern, a species rarely seen in this region and a real treat for the group. As we continued, we once again spent time with the jackal pack, watching their fascinating social interactions and the effortless way they navigated the grasslands.

The afternoon drive brought more excitement, with lovely views of scarlet minivets glowing like embers against the canopy. We also recorded multiple jungle owlets, a pair of elegant crested treeswifts circling overhead, and a wonderfully cooperative Indian scimitar babbler, giving everyone an opportunity to enjoy its distinctive features and behaviour.

Sunday 16 November 2025

Day 13:

Kanha National Park

Early in the morning, after a warm cup of tea, we left for another safari.

On entering Mukki, we heard alarm calls from all directions. One series of calls led us to a large pack of wild dogs — eight strong individuals resting inside the forest. We later tracked them as they moved through the jungle and eventually came onto the road. We spent about half an hour with them as they displayed their social behaviour — grooming, greeting, play and territory marking.

After leaving the dogs, we explored some quieter areas for birds. We saw excellent species, including rufous woodpeckers, ultramarine flycatchers and a golden oriole.

In the afternoon, we followed a trail of fresh alarm calls and pugmarks. This led us to MV3, a tigress. We positioned ourselves with enough space for her, and she crossed the road right in front of us, showing off her rich orange coat. Later, we tracked her again, and this time she walked directly towards us, giving wonderful photographic moments before slipping back into the forest.

Monday 17 November 2025

Day 14:

Kanha National Park

This morning, we headed into the Kanha zone, where the forest greeted us with a quiet, almost contemplative stillness. The soft light filtering through the sal trees made the silence even more atmospheric. Near Schaller Point, a lovely surprise awaited us - two male blackbucks standing proudly among a large herd of spotted deer. Their contrasting elegance and striking horns made the sight particularly memorable.

As we moved further into the meadows, we came across a large fig tree heavily laden with fruit. We decided to pause here, and the next fifteen minutes turned into a delightful birding session. The canopy was alive with activity - coppersmith barbets calling from within the foliage, yellow-footed green pigeons feeding

Find out more about our [India's Red Pandas, Rhinos & Tigers](#) trip or [contact us](#)

01962 302086 sales@wildlifeworldwide.com www.wildlifeworldwide.com

contentedly, and a few warblers flitting about restlessly. Beneath the tree, a long-tailed shrike kept its watchful position, perched patiently and scanning the ground for prey.

In the afternoon, we returned to the Mukki zone for our final safari. We began with a productive birding stretch before making our way towards Baba Thenga, where we decided to wait quietly for any signs of predator movement. Our patience paid off almost instantly. Within a minute, a powerful sambar alarm call broke the silence, quickly followed by the warning barks of langurs, clear signs that something big was on the move.

Moments later, a tigress emerged from the lantana thickets, her presence unmistakable even through the dense vegetation. She walked with calm confidence, slowly making her way down toward the road. In complete awe, we watched as she crossed right in front of us, offering an unforgettable sighting and bringing the tour to a spectacular, emotionally charged finale.

Tuesday 18 November 2025

Day 15:

Drive to Nagpur

After many early mornings, today we enjoyed a well-deserved lie-in. Following a relaxed breakfast, the group departed for Nagpur at 9:15 am. With the afternoon free, everyone took the opportunity to unwind, rest, and reflect on the incredible experiences of the past days. In the evening, we regrouped for a warm, final dinner together before leaving for the airport later at night.

Wednesday 19 November 2025

Day 16:

Fly back

Just after midnight, we started for airport and boarded our respective flights back home, bringing this memorable journey to a close - filled with rich sightings, great company, and experiences that will stay with us for a long time.
